1. Introduction

The **XANDOCLUY Order Management System (XDL-OMS)** is a web-based platform designed for XANDOCLUY Sports Apparel, a printing and garment shop. It manages the full order lifecycle: job order creation, item costing, payment collection, and claim tracking across one or more branch locations.

This manual covers all modules available to staff, cashiers, admins, and superadmins. Read only the sections relevant to your role.

Key Capabilities

- Create and manage job orders for garments, tarpaulins, DTF, bags, and more.
- Dynamic per-item pricing with automatic calculations for sized clothing and tarpaulin prints.
- Payment collection with change computation and printable receipts.
- Multi-branch support with per-branch user assignments.
- Role-based access control -- each role sees only what it is permitted to see.
- Purchases and expense tracking per branch.

2. Getting Started

2.1 Logging In

Open the application URL in your browser. The default landing page is the login screen.

Field	Description
Username or Email	Enter your assigned username or email address.
Password	Enter your password (minimum 6 characters).

Note: After your account is set to Inactive by an Administrator, you will be redirected to an inactive page. Contact your Admin to reactivate.

On successful login you are redirected to your role dashboard:

- **Admin / Superadmin** -- Admin Dashboard with system-wide statistics.
- **Staff / Cashier** -- Staff Dashboard showing today's orders and quick actions.

2.2 User Roles and Permissions

The system uses four roles with hierarchical access levels.

Role	Description
Superadmin	Full access to all modules including user management, roles, permissions, system logs, and all settings.
Admin	Same as Superadmin except cannot manage other admins. Can manage branches, item prices, users, and
Staff	Can create and manage job orders within their assigned branch. Cannot manage users or system settings.
Cashier	Similar to Staff. Focused on payment collection and viewing transactions. Restricted to assigned branch.

Device Binding: Staff and Cashier accounts may be bound to a specific device. Logging in from an unregistered device will be blocked until an Admin unbinds the previous device.

2.3 Dashboard Overview

The sidebar navigation lists all modules available to your role. Common interface elements:

- **Top header** -- Account menu, user name display.
- **Left sidebar** -- Module navigation (Transactions, Customers, Expenses, Branches, etc.).
- **Dashboard cards** -- At-a-glance metrics: total orders, unpaid balance, today's revenue.

3. Customer Management

Customers are the clients whose orders are tracked. Every job order must be linked to a customer.

3.1 Viewing Customers

Navigate to **Customers** in the sidebar. The list shows all customers (50 per page).

- Use the search bar to find customers by first or last name.
- Each row shows branch, name, mobile number, and status badge.
- Click a customer name or the eye icon to open their full profile.

3.2 Adding a Customer

Click **Add Customer** (green button, top right). A modal dialog appears.

Field	Required	Notes
First Name	Yes	Saved in UPPERCASE automatically.
Last Name	Yes	Saved in UPPERCASE automatically.
Mobile Number	Yes	Any format accepted (e.g. 09XXXXXXXXXX).
Address	Yes	Street or house number.
Province	Yes	Select from dropdown.
City / Municipality	Yes	Populates based on selected province.
Barangay	Yes	Populates based on selected city.
Branch	Admin only	Staff accounts default to their own branch.

Click **Save Customer**. The new customer appears in the list instantly without a page reload.

3.3 Editing a Customer

In the customer list click the pencil icon. The same modal opens pre-filled with existing data. Address components only update when all three (province, city, barangay) are selected.

3.4 Blocking / Unblocking a Customer

Open a customer profile. Use the **Block** or **Unblock** button to toggle their status. Blocked customers cannot be selected when creating new job orders.

3.5 Customer Profile Page

The customer profile shows two tabs and summary cards:

- **Transactions tab** -- Full order history: job order number, date, amount, balance, payment and claim status.
- **Payments tab** -- All accepted payments with date, amount, and job order reference.
- **Summary cards** -- Total orders, total billed, total paid, total balance, and unpaid order count.

4. Job Orders (Transactions)

A **Job Order** represents one printing or garment order for a customer. It contains header information, one or more line items, and tracks payment and claim progress.

4.1 Viewing Job Orders

Go to **Transactions** in the sidebar. The list shows the 25 most recent orders.

Filter	Description
Search	Matches job order number or customer name.
Payment Status	Filter by Unpaid, Partially Paid, or Paid.
Claim Status	Filter by In Queue, Ready, Claimed, or Canceled.
Date From / To	Narrow results to a specific date range.

Staff restriction: Staff accounts only see orders belonging to their assigned branch.

4.2 Creating a Job Order

Click **New Job Order** (top right of the Transactions page). Fill in the header fields, then add one or more line items.

Header Fields

Field	Required	Notes
Customer	Yes	Type to search. Click "+ New Customer" to add inline.
Deadline	No	Target completion date shown on the printed job order.
Note	No	Internal note (e.g. design instructions).
Material	No	Default material for all items (overridable per item).
Has File Upload	No	Check if the customer has provided design files.
Remarks	No	Additional remarks for the order.

Adding Items

Click + **Add Item** to insert a new item card. The form layout adapts automatically based on the selected item type.

- **Item Type** -- Select from dropdown. Layout changes to match the type.
- **Material** -- Material for this specific item.
- **Unit Price** -- Auto-filled from Item Price Settings; always editable.
- **Discount** -- Discount in pesos applied to this item group.
- **Notes** -- Per-item production notes.
- **Remove (x)** -- Removes the entire item card.
- The **Order Total** at the bottom updates in real time.

Duplicate submission protection: Each job order form has a one-time session token. Submitting twice with the same token is rejected with an error alert. Reload the page to retry.

4.3 Item Types and How They Work

Item types fall into three categories, each with a different input layout:

A. Sized Clothing

Types: T-Shirt, Jersey Upper, Jersey Lower, Polo Shirt, Jogging Pants, Jacket, Long Sleeves.

A size grid appears with quantity inputs for each size: XS, S, M, L, XL, XXL, XXXL, KIDS. Enter the quantity needed per size. Total quantity and item total update automatically.

Example: 10 pcs S + 20 pcs M + 5 pcs XL = 35 pcs @ P120.00 each = P4,200.00

B. Tarpaulin

Enter Width (ft), Height (ft), Quantity (number of pieces), and Unit Price per sq ft. The system automatically computes:

- Sq Ft = Width x Height
- Total Sq Ft = Sq Ft x Quantity (pieces)
- Item Total = Total Sq Ft x Unit Price - Discount

Example: 3 ft x 5 ft = 15 sq ft x 100 pieces x P18.00/sq ft = P27,000.00

C. Non-Sized (DTF, Bags, Others)

A single Quantity field appears. Item Total = Quantity x Unit Price - Discount.

Item Type	Category	Key Inputs
T-Shirt	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Jersey Upper	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Jersey Lower	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Polo Shirt	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Jogging Pants	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Jacket	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Long Sleeves	Sized Clothing	Qty per size (XS-KIDS), Unit Price, Discount
Tarpaulin	Tarpaulin	Width, Height, Qty (pcs), Unit Price/sq ft, Discount
DTF	Non-Sized	Quantity, Unit Price, Discount
Bags	Non-Sized	Quantity, Unit Price, Discount
Others	Non-Sized	Quantity, Unit Price, Discount

4.4 Editing a Job Order

From the list or detail page click the **Edit** (pencil) button. The form pre-fills all header fields and reconstructs item cards from the database. Sized clothing items show the size grid pre-populated.

Tarpaulin items show saved width, height, and piece quantity.

Important: Once a job order is Finalized, the Edit button is hidden and the order is locked permanently.

4.5 Approving a Job Order

From the job order detail page, click **Approve**. A confirmation dialog appears. Click **Yes, Approve** to confirm. The page reloads showing the approval stamp (approved by whom, date and time).

Approval is typically done by an Admin or Superadmin to confirm the order is accepted for production.

4.6 Finalizing a Job Order

From the detail page click **Finalize**. A red warning dialog appears -- this action is irreversible.

- The order is permanently locked. No further edits are possible.
- The finalized timestamp is recorded.
- The Edit button is removed from all list and detail views.

4.7 Claim Status Management

On the job order detail page, a dropdown updates the Claim Status in real time (no page reload).

Status	Badge Color	Meaning
In Queue	Blue	Order received; production not yet complete.
Ready	Yellow / Orange	Order is ready for customer pickup.
Claimed	Green	Customer has collected the order.
Canceled	Red	Order was canceled.

5. Payments

5.1 Receiving a Payment

Payments can be received from two locations:

- **Transaction List** -- Click the green money icon on any unpaid or partial row.
- **Transaction Detail** -- Click the **Receive Payment** button on the show page.

A modal dialog shows the job order number and current balance.

Field	Notes
Amount Received (P)	Enter the cash amount the customer is handing over.
Change	Auto-calculated: Amount Received minus Balance. Displayed when amount > 0.

Click **Confirm**. The system records the payment, recomputes the balance, updates the payment status, and redirects to the printable payment receipt.

Partial payments are allowed. If a customer pays less than the full balance, the status moves to "Partially Paid". Additional payments can be received later.

5.2 Payment Status Reference

Status	Badge Color	Meaning
Unpaid	Red	No payment received yet. Full balance outstanding.
Partially Paid	Yellow / Orange	At least one payment received but balance remains.
Paid	Green	Balance is zero. Order is fully paid.

5.3 Payment Receipt

After each payment the system redirects to a printable receipt. It includes:

- Job order number and OR number.
- Customer name.
- Amount paid in this transaction.
- Remaining balance.
- Date and time of payment.
- Cashier name.

Press **Ctrl+P** (Windows) or **Cmd+P** (Mac) to print the receipt.

6. Printing the Job Order

From the job order detail page click **Print Job Order**, or press Ctrl+P. The system hides navigation, sidebar, header, and action buttons automatically, leaving only the job order content with zero top margin.

The printed output includes:

- Shop header: XANDOCLUY Sports Apparel and branch information.
- Customer name, mobile number, and address.
- Job order number, date created, and deadline.
- Itemized table: type, sizes or dimensions, quantity, unit price, discount, total.
- Order total, total discount, and remaining balance.
- Notes and remarks.
- Approval and finalization stamps (if applicable).

Tip: In your browser print dialog set margins to "None" or "Minimum" for best results on thermal or A5 paper.

7. Expenses and Purchases

The Expenses module tracks two categories: **Purchases** (raw materials for production) and **Expenses** (operational costs such as salary, rent, and utilities).

7.1 Recording a Purchase

Go to **Purchases** in the sidebar. Click **Add Purchase**.

Field	Required	Notes
Type	Yes	Tela, Paper, Ink, Needle, Thread, Sorted, Lining, Others.
Description	No	Free-text description of the item purchased.
Amount (P)	Yes	Must be greater than 0.
Date	Yes	Date the purchase was made.
Remarks	No	Additional notes.

7.2 Recording an Expense

Go to **Expenses** in the sidebar. Click **Add Expense**.

Expense Type	Description
Salary	Employee wages.
Transport / Gasoline	Delivery or travel costs.
Upload / IP Load	Internet or SIM load charges.
Snacks / Meal	Team meals and snacks.
Rent	Monthly rent payment.
Water + Elec + Internet + Utilities	All combined utility bills.
Commission	Commissions paid to staff or agents.
Reports	Printing or report-related costs.
Others	Any expense not covered by the above types.

Delete restriction: Only Admins can delete expense records. Staff can only edit records they personally added.

8. Branch Management

Branches represent physical store locations. This module requires the **manage-settings** permission (Admin / Superadmin only).

8.1 Creating a Branch

Go to **Branches** in the sidebar. Click **Add Branch**.

Field	Required	Notes
Branch Name	Yes	Full descriptive name (e.g. "Main Office Dipolog").
Branch Code	Yes	Short unique code (e.g. "MAIN-DIP"). Max 20 characters.
Type	Yes	Main, Sub, or Kiosk.
Address	Yes	Full street address of the branch.
Contact Number	No	Branch phone or mobile number.
Status	Yes	Active or Inactive.

Branch Code must be unique. The system will reject duplicates.

8.2 Assigning Users to a Branch

Open a branch by clicking its name. The Branch Detail page shows:

- **Branch Info** -- Edit branch name, code, type, address, contact, and status.
- **Assigned Users** -- List of users assigned to this branch with their role.

To **add a user**: select from the dropdown (only unassigned users are shown) and click **Add User**. A user can only belong to one branch at a time.

To **remove a user**: click the **Remove** button next to their name in the assigned list.

Delete restriction: A branch cannot be deleted while it has assigned users. Remove all users first.

9. Item Price Settings

Item Prices set the **default unit price** auto-filled when a staff member selects an item type on a job order form. Requires Admin / Superadmin access.

Go to **Item Prices** in the sidebar under Settings. Edit any or all prices and click **Save All Prices**.

How auto-fill works: When an item type is selected on a job order form, the system fetches the saved default price via AJAX and fills the Unit Price field. The price is always editable per item.

Item Type	Typical Default Price
T-Shirt	P120.00 per piece
Jersey Upper	P180.00 per piece
Jersey Lower	P150.00 per piece
Polo Shirt	P200.00 per piece
Jogging Pants	P160.00 per piece
Jacket	P250.00 per piece
Long Sleeves	P140.00 per piece
DTF	P50.00 per piece
Bags	P80.00 per piece
Tarpaulin	P18.00 per sq ft
Others	P0.00 (set manually per order)

10. User Management

Manage system user accounts. Requires the **manage-users** permission (Admin / Superadmin).

Go to **Users** in the sidebar.

10.1 Creating a User

Click **Create User**.

Field	Required	Notes
Name	Yes	Full display name.
Email	Yes	Must be unique. Can be used for login.
Username	Yes	Must be unique. Primary login credential.
Password	Yes	Minimum 6 characters. Must be confirmed.
Role	Yes	Only roles with a lower level than your own are shown.
Permissions	No	Additional direct permissions beyond the role default.

10.2 Editing / Deactivating a User

Click the edit icon next to a user. Update name, email, role, and permissions as needed. Leave the password field blank to keep the current password.

To deactivate a user set their **Status** to "Inactive". Inactive accounts are redirected to the inactive page on login and cannot access the system.

10.3 Device Binding

User accounts can be bound to a specific device for additional security.

- When a bound user logs in from an unregistered device, access is blocked.
- To **unbind**: on the Users list click the **Unbind** icon. The user can then log in from any device.
- To toggle device restriction on/off: use the **Restrict** toggle on the user list row.

11. Status and Badge Reference

Payment Status

Badge	Color	Meaning
Unpaid	Red	No payment received. Full balance outstanding.
Partially Paid	Yellow / Orange	Payment received but balance remains.
Paid	Green	Fully paid. Balance = P0.00.

Claim Status

Badge	Color	Meaning
In Queue	Blue	Order is in production queue.
Ready	Yellow / Orange	Order completed; awaiting customer pickup.
Claimed	Green	Customer has collected the order.
Canceled	Red	Order has been canceled.

Customer Status

Badge	Color	Meaning
Active	Green	Customer can place orders.
Blocked	Red	Customer is blocked and cannot be selected on new orders.

Branch Status

Badge	Color	Meaning
Active	Green	Branch is operational.
Inactive	Grey	Branch is closed or not currently in use.

12. Keyboard and Navigation Tips

Action	How to Do It
Print Job Order	Open job order detail then click Print, or press Ctrl+P / Cmd+P.
Print Payment Receipt	Redirect happens automatically after payment; press Ctrl+P / Cmd+P.
Search Customers on Job Order Form	Start typing in the Customer field -- Select2 auto-searches.
Add New Customer from Job Order Form	Click the "+ New Customer" link below the customer dropdown.
Reload After Error	Press F5 or Ctrl+R. Required after a duplicate submission error.
Clear Filters on Transaction List	Remove all filter values and click Filter with empty fields.
Navigate to Dashboard	Click the XANDOCLUY logo or "Dashboard" in the sidebar.

Data integrity guarantee: All data-modifying actions (create, update, payment, approve, finalize) are wrapped in database transactions. If any step fails, all changes are automatically rolled back and an error alert is shown.

End of Document -- XANDOCLUY Order Management System User Manual, Version 1.0, June 2026.
